www.bauer-digital.co.uk

Bauer Digital is one of the leading manufacturers of display products working with global partners to deliver a range of cost-effective hardware solutions.

Our success is down to our innovative product design and performance. This approach is key to the development of Bauer Digital products.

Freestanding Indoor Displays

Deliver your content in style!

Sleek and stylish – designed to look good in any hospitality, reception or retail and restaurant environment as a standalone or networked advertising or information display.

Key Features

- Available in sizes 42", 50" & 55"
- Optional built in Windows Media PC
- Networked or wifi
- Full HD 1080p LED Displays designed for 24/7 use

Applications

- Hotels & Hospitality
- Navigation & Way finding
- Retail & Restaurant Advertising

Freestanding Touch Displays

Ideal as a navigation and way finding solution or as a product browsing tool to enhance your customer's online experience in store. Aesthetically pleasing and built for demanding use in public places.

We offer two designs in portrait and landscape orientation featuring Infra Red Touch screen technology and the latest IPS LED display for clarity and wide viewing angle.

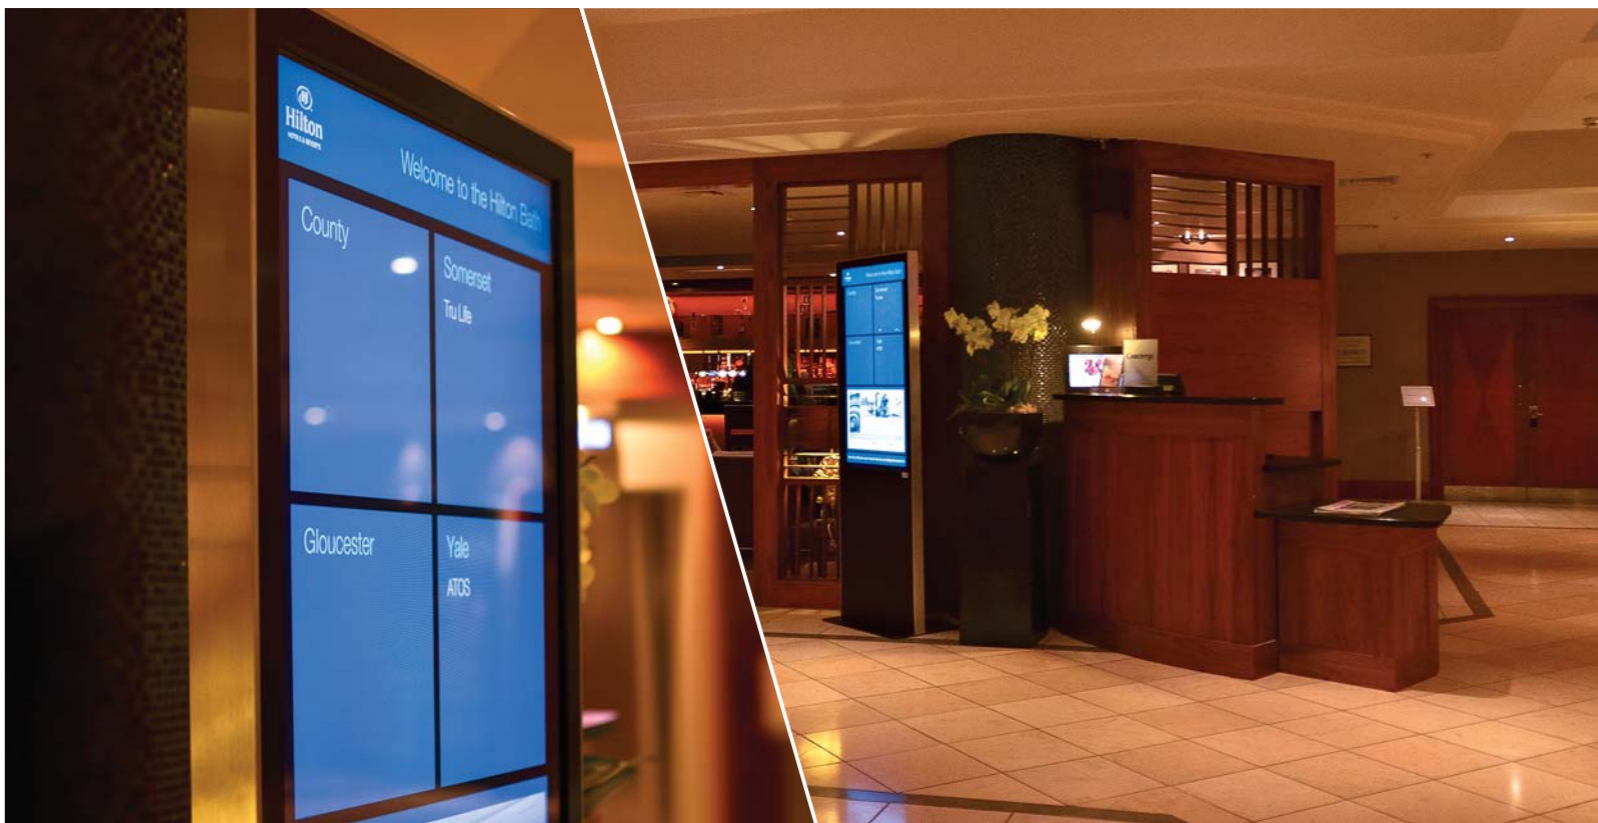

Key Features

- Built in Intel i5 Windows Media PC
- Networked or embedded wifi
- Full HD 1080p IPS LED Display designed for 24/7 use
- Available in 55" portrait & landscape design

Applications

- Hotels & Hospitality
- Navigation & Way finding
- Retail & Restaurant Advertising

Outdoor Applications

When placing digital signage in an outdoor environment, you must be confident the display will survive whatever the weather. Manufactured to ISO9001 safety standards, Bauer all weather displays can cope with their IP65 enclosures, antivandal safety glass and patented thermal temperature control technology.

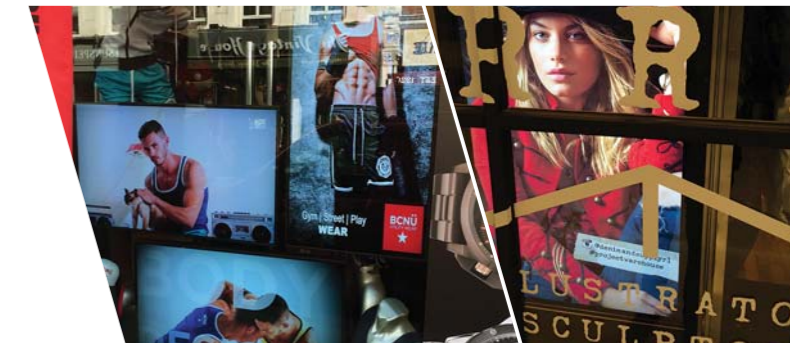

We offer a number of designs in portrait & landscape orientation from 32" to 82" sizes.

Window Specific Sunreadable Displays

Our high bright LCDs are designed to work effectively in direct sunshine and minimise reflective glare to deliver a clear and visible picture from inside a store window.

Available in a range of sizes from 42" - 65" in portrait or landscape orientation.

Commercial Touchscreen Applications

Bauer Digital has partnered with leading touch producer TSD Technology Ltd to distribute a new range of high quality touch solutions for demanding commercial applications. The lineup features edge to edge zero bezel glass across touch monitors, all in one touch PC and open frame solutions.

Key Features

- SAW (Surface Acoustic Wave) - dual-touch solutions. The touch sensors are placed on the back of the glass which allows edge to edge glass similar to tablet & Smartphone technology, dust dirt and water resistant. The touch screen remains functional if dirty or affected with surface water.
- The SAW technology offers a similar experience and look as PCAP touch offers at a better price level.
- SAW touch already has proven itself with more than two decades in commercial operation.

All in one Touch PC Solutions

The AIO series features an all-in-one computing system with options from 15" to 42" LED displays. Utilising Intel i3 & Intel i5 processors with embedded twin antennae wifi, designed with anti vandal scratch protection zero bezel glass offers a complete touch solution for a variety of commercial applications.

Key Features

- Sizes available 10.1", 15.6", 18.5", 21.5", 32", 42"
- SAW touch screen technology
- Glass: IPX5 water, dust & humidity protection
- Mohs 7 hardness - anti scratch
- All in one aluminum extrusion design
- Landscape & portrait screen mode
- VESA or desk mounting
- Built-in Intel Core™ i3 & i5

Models

- AIO156
- AIO185
- AIO215
- IDS320
- IDS420

Applications

- Hotels & Hospitality
- Navigation & wayfinding
- Reception areas
- Retail shops & restaurants
- Information centers

Commercial Touch Monitors

Our commercial touch monitors are available from 10" to 42" screen sizes versatile as a desktop or VESA mounted solution. We also manufacture open frame displays for kiosk and integration applications.

Key Features

- SAW touch screen technology
- Glass: IPX5 water, dust & humidity protection
- Mohs 7 hardness – anti scratch
- All in one aluminum extrusion design
- VESA or Desk mounting
