RA-Studfix™ V2

Partition Wall to Floor Mounting System for Large Flat Screens and Touch Screens

This complete mounting system is designed for installations when the mounting wall is of Wooden Stud Partition construction which cannot support the weight of the screen itself. The kit comprises of a Wall Plate to fix onto the wall surface through to the existing Wooden Studs inside the wall, a Floor Mounting Plate, two Upright Supporting Legs and a Universal Fitting VESA Mount Plate for ANY size screen with VESA mounting up to and including 800x600. Once installed, the system creates a safe, strong and rigid mounting frame for flat screens up to a recommended maximum weight of 80kg. The system directs the weight of the screen directly to the floor and has built in adjustment to clear any Wall Surface Mounted Network Trunking or Dado Rails. The screen can also be set at a selection of height positions and the Upright Supporting Legs have cable entry and exit apertures on the rear face to allow all connection cables to be routed through the centre to and from the screen to ensure a neat and tidy installation. A full installation bolt and screw kit is included and full installation instructions. Optional Extra Cost Media Shelves are also available for fitment under the screen as shown in the images below.
