Education / Special Needs

Our spaces are used for both mainstream and SEN education. We have created spaces from 3x3m to 8x8m incorporating interactive walls, floors, surround audio and FXs including coloured lighting, aromas and wind.

Medical Simulation

We have spaces in sim-centers, universities and training hospitals all over the world including a space for the Royal Flying Doctors Service in Australia. The spaces are used to created realistic environments for simulation as well as for immersive lessons.
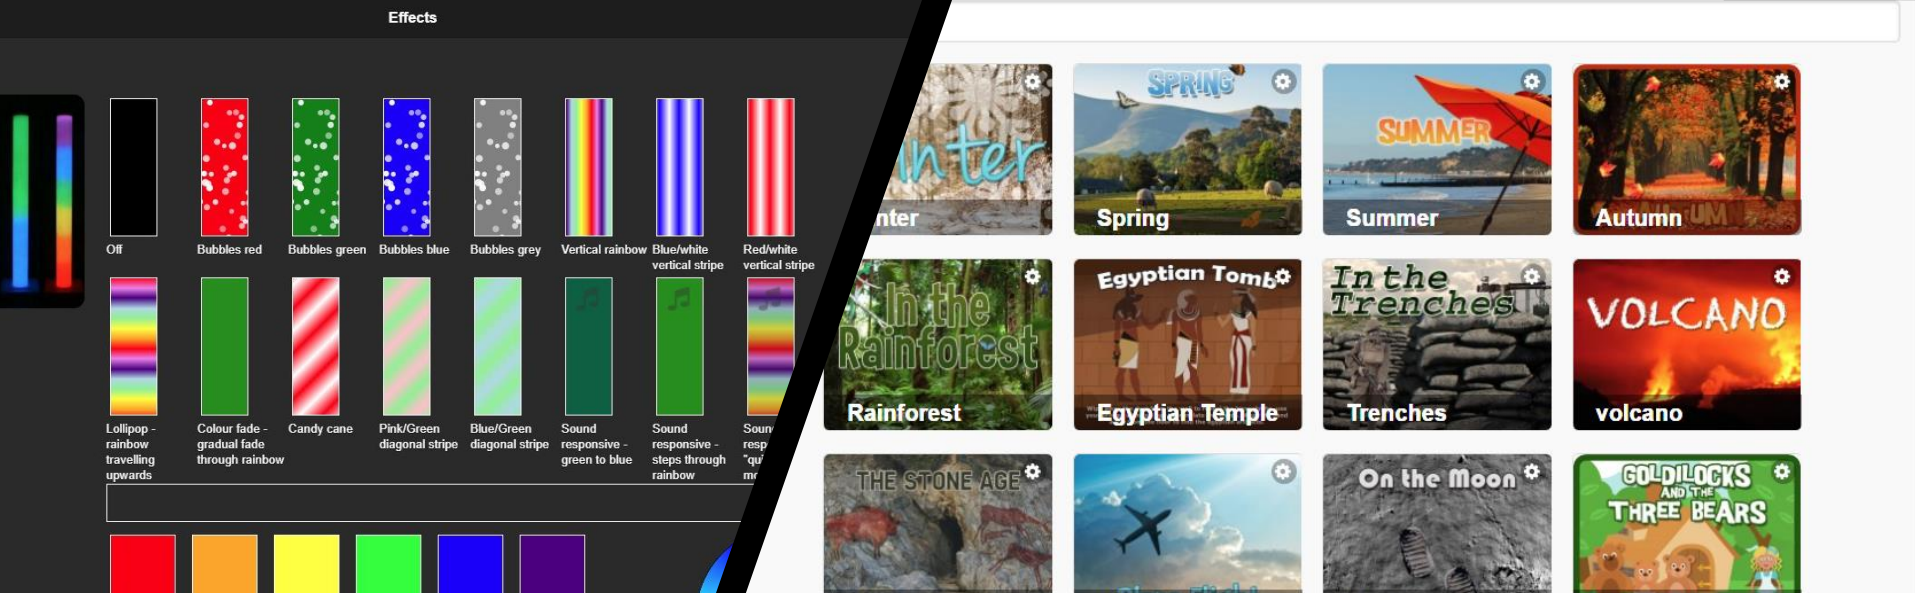

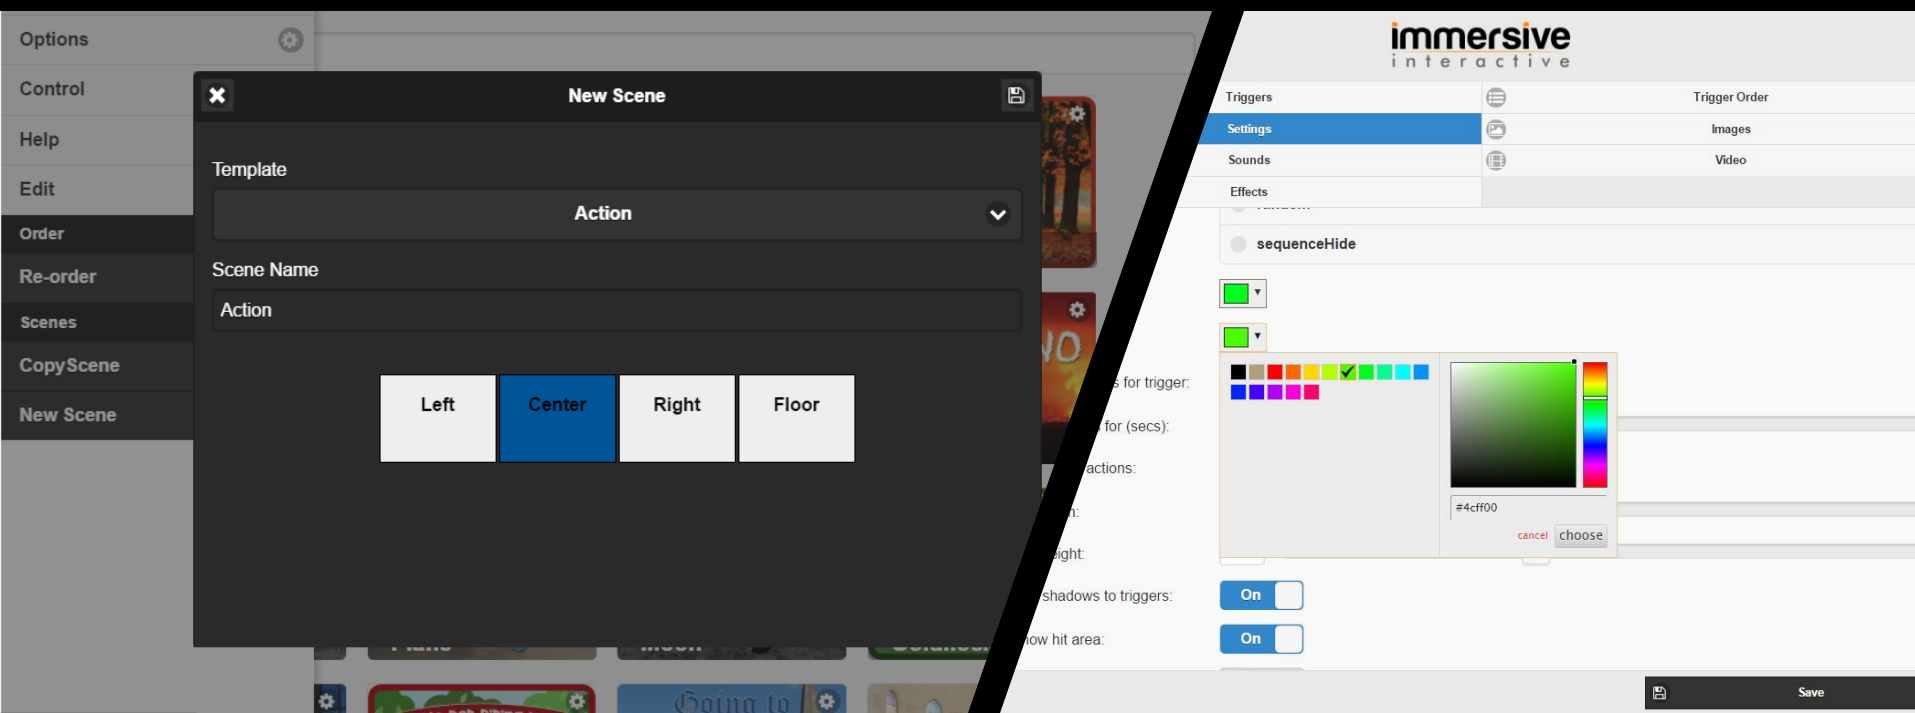

Our Software

- Our software is designed to play, manage and control content in immersive spaces.

- It enables you to create, customize and display content including interactive experiences, FXs and sounds.

- Experiences are selected from a tablet.

- Using our cloud-based software you can easily create and share interactive experiences between sites.

Effects

Interaction

All our spaces feature touch interactive walls.

Many also include an interactive floor. Gesture based interaction is also used in some spaces.

FXs

Many spaces incorporate, scent, lighting wind and other sensory effects to enhance the experience.
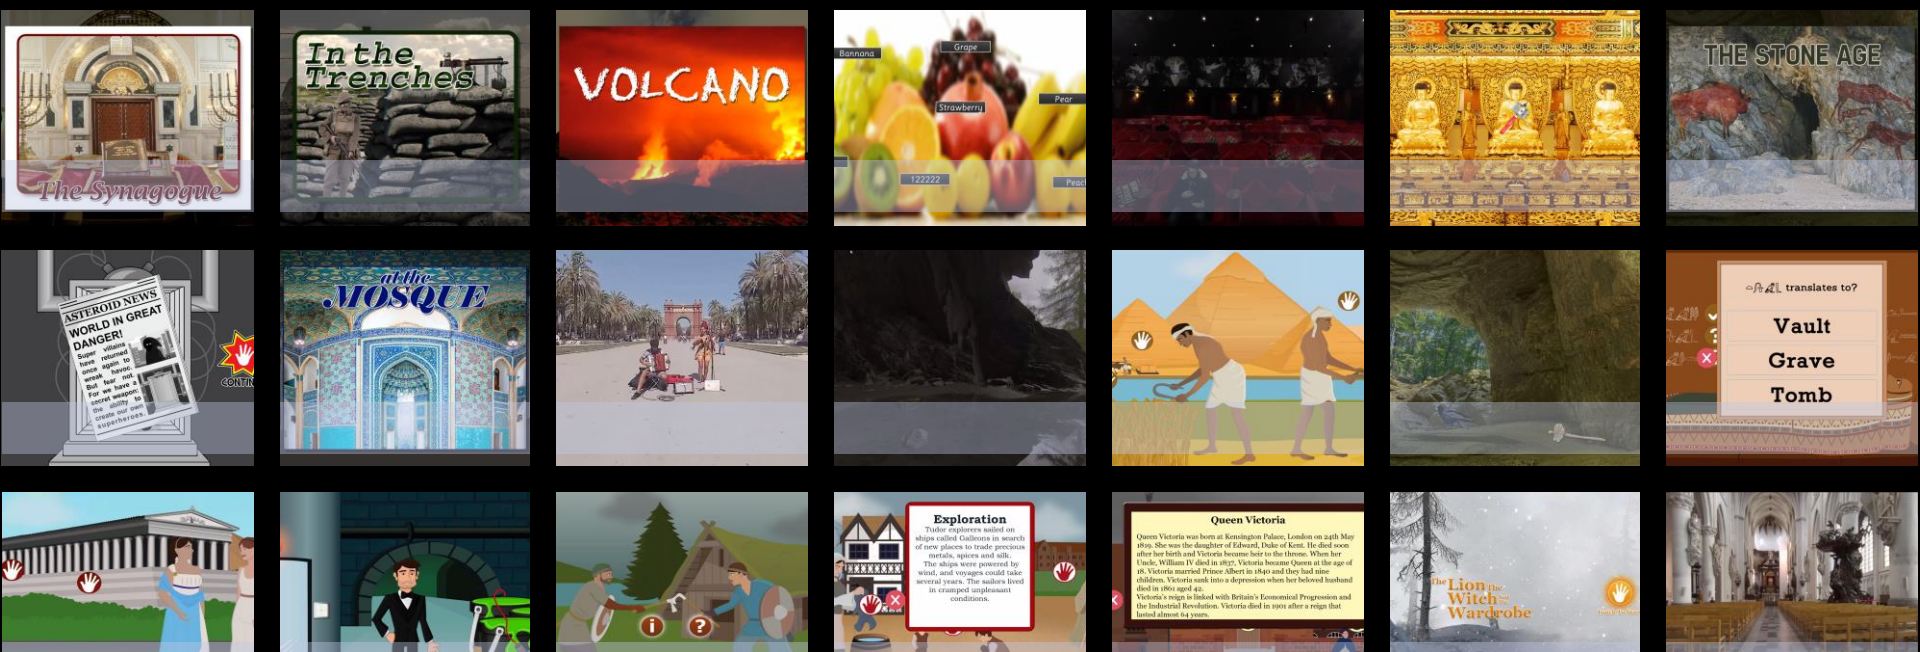

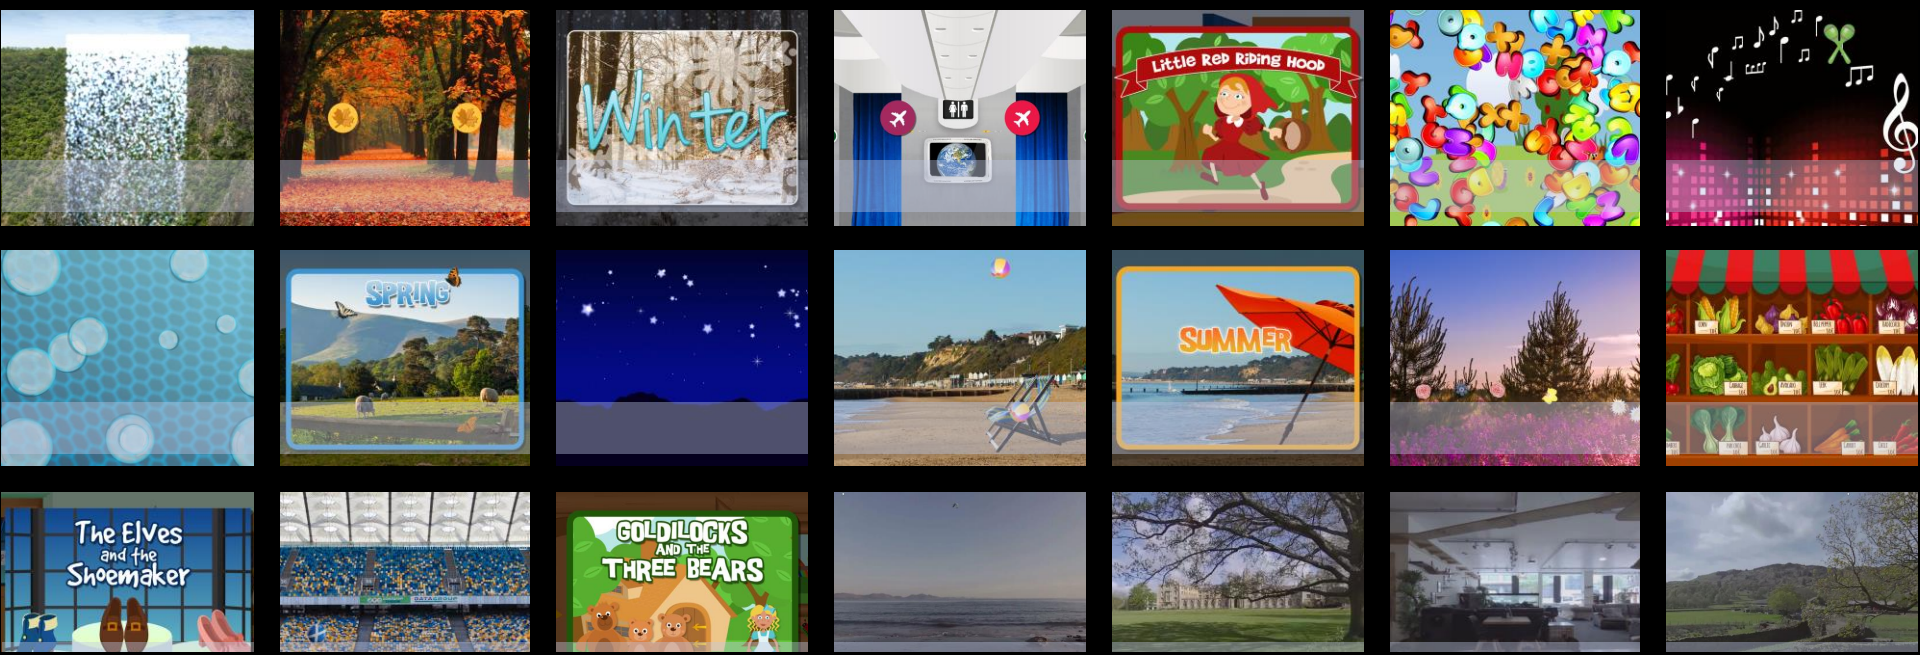

Content Creation

We specialise in the creation of immersive content for use in a variety of spaces. Our in house team develop 2D and 3D experiences, create characters and stories and capture environments in 360°

Education: dozens of curriculum based educational experiences covering English, Geography, History and many more subjects.

Sensory and life skills: interactive sensory activities, realistic environments to practice life skills or just pleasant environments to experience and relax in.

Barbers Shop – experience challenging environments in a safe and controlled way

Green Cross Code – learn about road safety

A trip to the countryside - Great for calming and relaxing

Sunset on the beach - One of many relaxing nature scenes

Pop the bubbles - Cause and effect can be customised to suit children with differing ranges of movement

On a plane - Roleplay going on a flight, where will you go?

Story time - Touch the hotspots to hear the story of goldilocks

Jungle - Hear the story and interact with the animals

Immersive Studio

Our software enables you to easily create your own interactive immersive experiences including 8k 360 video

The process

1. Take your own 360 video or panoramas

2. Upload it

3. The discovery template converts the video to work in a rectangular room

4. Add interactive hotspots and info popups

Training & Support

Full on-site training is always given so that everyone is comfortable using the space. We provide dedicated support for all software and content matters as well as providing an extensive online knowledge base of solutions.
