

Dinosaurs: The Cretaceous Period

Wow! Wasn't that something? This is the Cretaceous Period, somewhere between 145 and 65 million years ago. A time when T-Rex was king. Look - on your left you can see a triceratops and over on your right is a velociraptor. Amazing... I should probably introduce myself. My name is Doctor Quatermain. I'm a professional time traveller and dinosaur enthusiast. Let's see what we can discover from this time. Touch the hotpots to learn more.

IMMERSIVE ROOM INSTALLATION

Halesowen CofE Primary School

Halesowen Church of England Primary School is based in the West Midlands. They're a school firmly committed to establishing a learning environment that is **inclusive** and **supportive**.

They reached out for us with an interest in our Immersive Sensory rooms, spaces which essentially surround students in an enriched world of visuals, audio, smell, and sense. To do this, Immersive rooms incorporate a variety of technical kit including projectors, surround sound, FX coloured lighting, and aroma/ wind machines.

After our initial consultation, it became clear that the best option for the school would be to create a space within a pre-existing room and then build up the immersive environment from this constructed framework. **A 'room within a room'**.

We presented this option to the business manager of the school and she seemed thrilled with the prospect so we got started right away.

In order to begin creating the immersive space, we first had to create the base of what would become interactive walls. This is a step unique to 'room within a room' projects and allows us to have as much control as possible in terms of **creating the school's ideal vision.**

Once those walls have been secured and plastered, we're ready to paint! The paint helps smooth out the wall surface and also ensures that any projected content looks as clear as possible.

And finally, we make sure to fit and secure all the necessary kit to create [a truly immersive space.](#)

QUOTE FROM JUDITH KNIGHT
(testimonial)

From interactive screens to touch tables to immersive rooms, we've got a long history of working closely with schools and educational centres to ensure an excellency and accessibility when it comes to teaching.
