

Immersive and Sensory Rooms, From Demonstration to Full Installation and Training

What Is a Immersive & Sensory Room

An Immersive Environment provides **the most beneficial multi-sensory experience for all levels of ability and learning**. ... Immerse yourself with the opportunity to project images and videos to three different walls and truly bring the sensory experience to life to make you feel as if you are really there.

We Can bespoke the rooms for Care Homes / Dementia needs / Education / Training Centres / Special needs

With all walls and floor Interactive this gives a full immersive arena, we can also include smells and weather conditions

Immersive and Sensory rooms in Education & Care homes

We offer a totally free of charge consultation and sensory room design facility where we will visit your premises and discuss with you what you are trying to achieve, how we can help and offer recommendations. Based on this discussion we will then draw up a scale plan of our proposal and an itemised quotation, including if required, the installation of all the equipment. We also work closely with builders and architects and as sensory rooms need numerous electrical points we can submit electrical plans for the room as well. However, these plans are not set in concrete and we are happy to keep working with you until you are completely happy. Once you have confirmed you want to proceed we will arrange with you a convenient time for us to come in and

install the sensory room. When everything is installed to your satisfaction the sensory room will be ready to go and we will then run through with you and your staff how all the equipment works.

- **Free visit & consultation.**
- **No Room too Big or Small**

We are passionate about providing the most innovative solutions possible to primary and special needs education facilities.

These unique learning spaces bring multi-sensory environments into the modern classroom, giving pupils an engaging and expansive learning experience. We believe in harnessing the transformative potential of immersive learning, using it to enrich every aspect of education.

EDIT WITH EASE

Our fully-integrated system allows you to discover, create and edit content easily, resulting in a completely tailored experience for your students.

Goldilocks story time in a fully immersive environment

LIMITLESS CONTENT

Bring any world to life in your classroom with the ability to simulate endless scenarios. Transport students to environments that inspire them.

A training session taking place in an immersion room

TRAINING & SUPPORT

Our team will provide in-depth training and continuous support, giving you peace of mind every step of the way.

Immersive Spaces in Special Needs Education

Immersive spaces are the next generation of sensory learning for special needs pupils. The flexibility of our immersive environments mean that scenarios can be controlled in a variety of ways for students of all abilities to enjoy. Whether the environment needs to be soothing or stimulating, the space can be adapted to suit the individual needs of SEN (special education learning) pupils. We can guarantee that our interactive learning spaces are fully inclusive and accessible for all learning abilities.
