## A POWERFUL OPS SOLUTION

### Performance meets Power

The 8th Generation Intel® Processors provides a new class of embedded computing with amazing new features. Three times more powerful than our Economical OPS this model is ideal for real-time rendering and 3D applications.

### Solid-State Drive

Uses flash memory to store data, which provides better performance and reliability over an HDD as well as faster start up speed. Up to 10 times faster than a traditional hard drive.

### Flexible Working

Run a wide range of different operating systems like Windows 8, Windows 10 or Linux to suit your way of working.

### Intel 4K Graphics

Experience a remarkable 4K resolution, with faster frame rates and outstanding visual details thanks to the Intel® HD Graphics 655 card, built for compute-intensive applications.

### Fully Embedded Solution

All the connectors are contained within the display including power and both video and audio signals so no external cables are required.

### Quality Commitment

Built with industrial grade components you can be confident in the reliability of our product and so offer a 5 year warranty on the OPS computer.

### DC Power Port

A mains power connection means the OPS can be used with display devices without an OPS slot.

### Economical

Utilise a higher performance level while consuming less power.

\*This product has a 5 year warranty when purchased with the Interactive Touch Displays otherwise a 3 year warranty is applied..
