

iSportsFloor

PLAY. LEARN. SUCCEED.

Interactive Learning Through Active Play

iSportsFloor is an innovative new development by Amazing Interactives Ltd that converts a floor area from 2m to 5m wide into an interactive play, sensory experience and teaching area.

Creates interactive images 2M to 5 M

Designed for Education, SEND, Hospitals and Leisure

Active, Engaging Interactive Floor Learning

Designed to support active learning, physical development, and engagement in education, SEND, and leisure environments.

Advantages of using ISportsFloor

- ✓ Encourages physical activity, problem-solving, and sensory engagement
- ✓ Stimulates learners both physically and mentally through active play
- ✓ Supports school sports funding and physical activity objectives
- ✓ Makes learning and exercise fun, inclusive, and motivating
- ✓ Promotes healthy competition through movement-based activities
- ✓ Develops fundamental movement skills supporting long-term physical wellbeing
- ✓ Can be used as a reward-based activity to encourage positive behaviour
- ✓ Supports children with additional or challenging needs
- ✓ Ideal for break times, after-school clubs, and enrichment sessions

ISPORTSFLOOR INSTALLED CEILING TILE MOUNTED

This system installs neatly in a **standard 600x600 ceiling tile grid** and is totally standalone. The system includes a 4000 ansi-lumen projector, mini PC and high resolution depth camera in one unit. The system is **maintenance free** with the projectors laser rated to 20,000 hours. The projected image size depends on ceiling height ranging from 2.5m up to 6m giving an equivalent image size of 2.1m to 5m wide.

ISPORTSFLOOR INSTALLED COLUMN MOUNTED

Where there is no ceiling tile grid or there is a sloping roof we provide a column solution that bolts to the ceiling support structure. This system has the same specification as the tiled solution but with a 5000 ansi-lumen projector. This system can also be customised to allow for various lens or brightness options to offer bigger interactive zones.
