bassett's farm primary school case study

FutureVisuals

executive summary

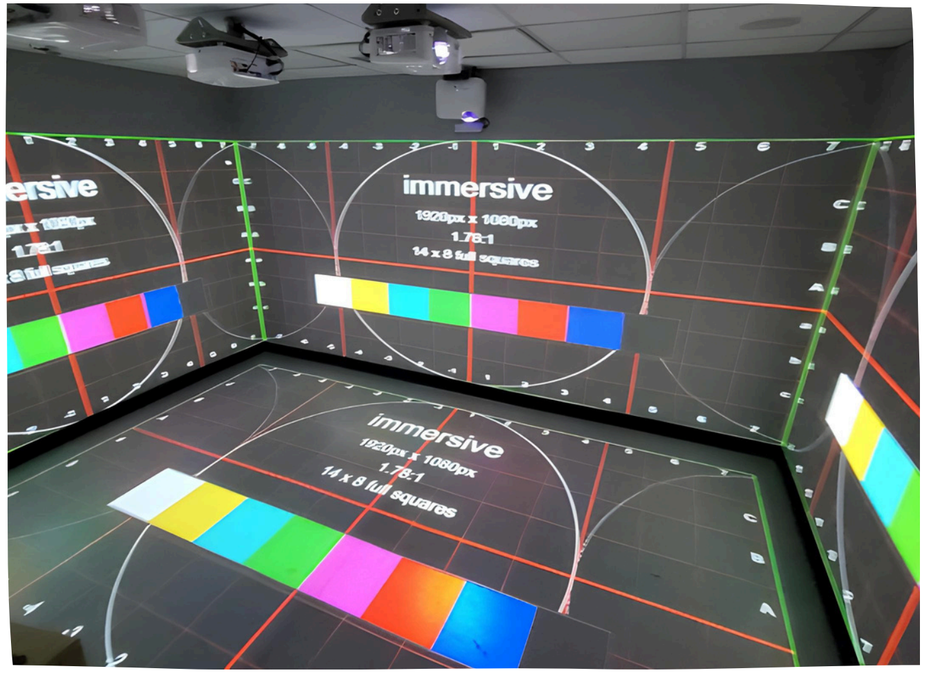

Bassett’s Farm Primary School partnered with us to deliver a fully integrated immersive learning environment, supporting the school from initial consultation through to design, installation and final commissioning. Our collaborative approach ensured the finished space aligned with the school's educational vision, creating an engaging and adaptable environment that enhances teaching and learning across the curriculum.

The immersive room was designed with a clear objective: to create an inclusive, interactive space where every pupil can actively engage with their learning. By combining 360-degree visual projection, interactive technology and multi-sensory experiences, the environment encourages participation, improves information retention and supports a wide range of learning styles and individual needs.

As an extension of Bassett’s Farm Primary School's mission to inspire a lifelong love of learning, the immersive space enables pupils to explore topics beyond the traditional classroom, bringing lessons to life through engaging and memorable experiences. From curriculum enrichment to sensory support, the room provides a flexible learning environment that empowers both teachers and students.

This project demonstrates how thoughtfully designed immersive technology can transform educational spaces, helping schools deliver more inclusive, impactful and future-focused learning experiences.

goals & objectives

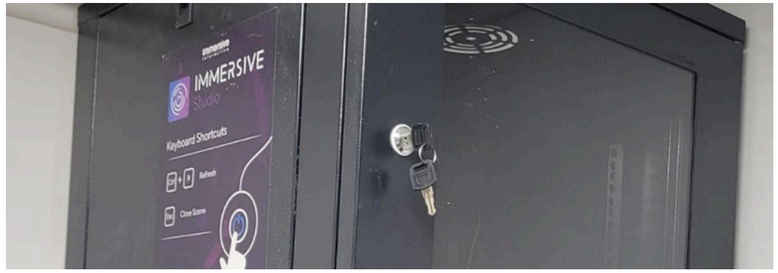

The primary objective of this project was to create a fully immersive learning environment that would enhance pupil engagement and support Bassett's Farm Primary School's commitment to delivering an inspiring, inclusive curriculum. Working closely with the school, we aimed to design a flexible space that would:

- Create an interactive, multi-sensory environment that encourages active participation and improves knowledge retention.
- Support a wide range of learning styles and individual pupil needs through adaptable immersive content.
- Extend learning beyond the traditional classroom by bringing curriculum topics to life with engaging 360-degree experiences.
- Provide teachers with a versatile resource that can be used across multiple subjects, age groups and educational activities.
- Deliver a complete turnkey solution, from consultation and room design through to installation and commissioning, ensuring a seamless experience for the school.

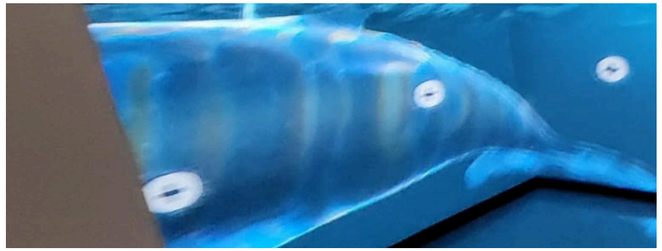

To support a smooth installation, we provided our comprehensive Room Requirements document, outlining all necessary specifications, including room dimensions, power requirements, wall construction and other installation considerations. Bassett's Farm Primary School prepared the space in advance, allowing our installation team to begin work immediately.

Room Dimensions: 4.3 m × 3.2 m × 2.4 m

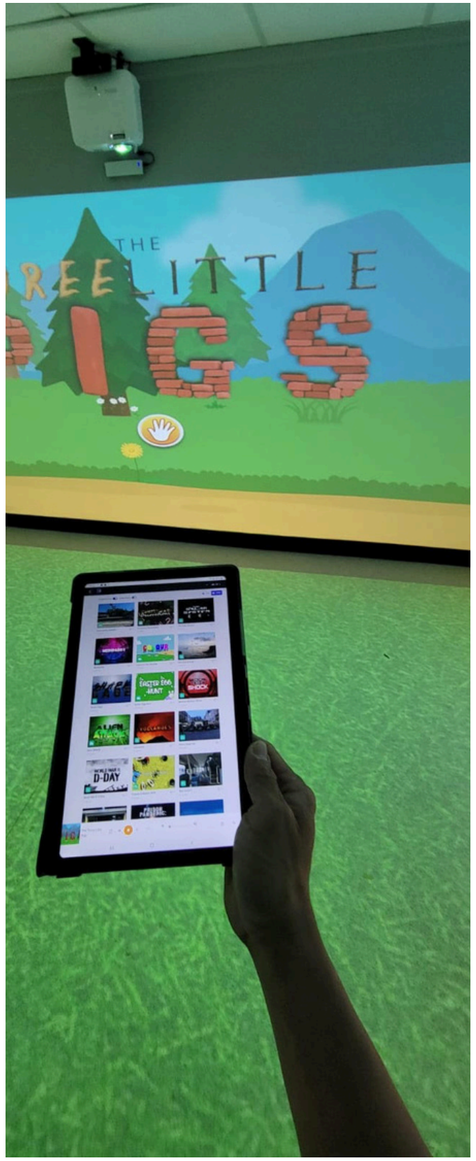

definition & scope

PHASE 1

Consultation & Design

Consultation with the School to understand their goals, requirements and vision, followed by a bespoke immersive room design.

PHASE 2

Installation

Supply, installation and integration of the immersive technology, including projection, audio and interactive systems.

PHASE 3

Commissioning & Handover

Testing, optimisation and commissioning of the completed space, ready for staff and pupils to use.

SCOPE INCLUDES

The project scope covered the complete delivery of Bassett's Farm Primary School's immersive learning space, from initial consultation and design through to installation, commissioning and handover. This included the supply and integration of immersive technology, system configuration and ensuring the finished environment was ready to support engaging, interactive learning experiences.

Your engineer, Franky, was brilliant in getting the system up and running. He guided us through the setup process, explained how to use the equipment, and provided advice on any potential hardware issues that may arise. If the children enjoy it as much as the teachers already do, we're going to have a very excited group of pupils eager to learn in their new immersive room. Thank you to everyone involved.

Charlie, Headteacher | Bassett's Farm Primary School

Transform learning with immersive environments.
